

300 Nights is a cyberpunk science fiction novel where a society controlled by genetic manipulation creates social classes based on neural implants and gene bums. The biological superpower, the Basic Protection Corporation, controls the key to human survival. Yet, the Company stands idly by while a deadly space-born virus hurled down to Earth during an apocalyptic meteor storm annihilates the human population above ground. Exiled to the Earth's™ womb, humanity now faces the BPC-born threat of another race more powerful and genetically superior to the Homo sapien. Humanity hangs in the balance with their defenders Benner, caught in the Demon's™ Hole of the next generation Mindbender, and Miranda only just discovering who she really is in a gritty new world.
