

Say goodbye to dry presentations, grueling formulas, and abstract theories that would put Einstein to sleep -- now there's an easier way to master the disciplines you really need to know.

McGraw-Hills Demystified Series teaches complex subjects in a unique, easy-to-absorb manner, and is perfect for users without formal training or unlimited time. They're also the most time-efficient, interestingly written brush-ups you can find. Organized as self-teaching guides, they come complete with key points, background information, questions at the end of each chapter, and even final exams. You'll be able to learn more in less time, evaluate your areas of strength and weakness and reinforce your knowledge and confidence. This clear, heavily-illustrated guide to the human body covers anatomy of cells and tissues, muscle tissue, major muscles of the body, nervous tissue, membranes, organs, cancer, the skin, the human skeleton, the nervous system, glands, the senses, the cardiovascular system, the immune system, the respiratory system, digestion, genitourinary system, the embryo, and more.
