

ObjectVision, a product of Borland International, is a windows-based visual development environment (VDE). A visual development environment makes applications development for a Windows environment easier by offering an interactive approach to interface design, and by hiding the unpleasant aspects of the Windows Application Program Interface (API) from the uninitiated. This book is written as a primary text for courses such as database development and design, or applications programming and design, as well as a supplementary text for students studying object-oriented techniques including database design or object oriented programming. This book offers a concise treatment of ObjectVision with sample applications and liberal use of screen captures. The text contains key words, summaries, and exercises.
