

Compared to film cameras, digital cameras are easy to use, fun and extremely versatile. Every day there's more features being designed. Whether you have the cheapest model or a high end model, digital cameras can do an endless number of things. Let's look at how to get the most out of your digital camera.

Display If you want to line up a good shot, you need to be able to see it. If you have vision problems, look for a digital camera with a larger screen. However, LCD displays can be hard to see in bright lightening so look for the brightest display that fits your budget. You need to also remember that the LCD displays use a lot of battery power. The way to combat this is to buy a camera that has automated power saving options.

Situations Your experience will dictate what type of flexibility you want out of a digital camera. Some cameras let you switch options to manual (ie f-stop, focus, etc.), which gives you more flexibility for your photos. Still other cameras are incredibly smart and can calculate everything in a split second so that you can take the best possible photo. So before you buy, think about what it is you want out of your camera and then research each of the cameras on your short list.
