

This ambitious book looks behind the model to reveal how economists use formal models to generate insights into the economy. Drawing on recent work in the philosophy of science and economic methodology, the book presents a novel framework for understanding the logic of economic modeling. It also reveals the ways in which economic models can mislead rather than illuminate. Importantly, the book goes beyond purely negative critique, proposing a concrete program of methodological reform to better equip economists to detect potential mismatches between their models and the targets of their inquiry. Ranging across economics, philosophy, and social science methods, and drawing on a variety of examples, including the recent financial crisis, *Behind the Model* will be of interest to anyone who has wondered how economics works - and why it sometimes fails so spectacularly.

Cities, Disaster Risk and Adaptation (Routledge Critical Introductions to Urbanism and the City), The Complete A. to Z. Guide of Good Sex, Linear Integral Equations (Applied Mathematical Sciences), Meditation for Beginners: How to Meditate to Relieve Stress, Achieve Inner Peace and Find Happiness, Troubleshooters Incorporated: Night Stalkings, Tibet & Nepal, Conversations with Peter Eisenman: The Evolution of Architectural Style, Fudan erudite series of advertising: Advertising Case Tutorial (3rd Edition),
