

Keeping up to date with new biosensors developments has been getting harder ...“ one of the fastest moving fields of academic and industrial research in the world“ a constant stream of new commercial applications“ centres of research excellence all over Europe, North America and the Pacific Rim“ enormous implications for monitoring personal health and fitness, the food we eat, the environment, health services and industry. The answer came on 20“22 May 1992, with BIOSENSORS 92. With a core of invited speakers and over 220 original contributed papers from 24 countries, BIOSENSORS 92 was the largest and most comprehensive event of its kind “ a response to the growing importance of biosensors as a powerful new technology. Elsevier Advanced Technology, the organizers of BIOSENSORS 92, have now published the proceedings of this important event. Biosensors 92 Proceedings contains over 150 papers presenting current research and developments straight from those who are leading the way in:“ Enzyme“based Sensors“ Affinity Sensors“ Environmental Monitoring using Biosensors“ Biosensors and Bioelectronics. Biosensors 92 Proceedings “ Your key to current awareness in sensor technology for just 90 [dollar rate subject to current ?/\$ exchange rate].
