

Computing Essentials Brief 2000-2001 offers a unique, visual orientation that gives students a basic understanding of computing concepts in a more concise fashion. While combining current topics and technology into a highly illustrated design geared to catch students'™ interest and imagination, this text provides an accurate snapshot of computing today without covering advanced topics such as information systems development and management, programming languages, and database management for future courses. When bundled with software application lab manuals, students are given a complete representation of the fundamental issues surrounding the personal computing environment.

Poetry 2005 - by 6th Grade Students of Fairfield Middle School, A Houseful of Girls, Cortex: Statistics and Geometry of Neuronal Connectivity, Pocket Map London, The Year in Quotes: 2010, The Art of Nautical Illustration.
