The book gives readers an

The book includes a careful analysis of the books of Genesis, Moses and Abraham, comparing the scriptural accounts. Did you know that modern scientific discoveries such as the Big Bang, dinosaurs, and the ancient age of the earth testify of a God-directed creation of the earth?

Members of the Church of Jesus Christ of Latter-day Saints have additional revelations from God that shed additional light on the Creation. The author has identified unique and amazing similarities between the revealed word of God and the truths discovered in the laboratory.

The scriptural accounts provide evidence that the Creation:

was carefully planned and organized by the Council of Gods

was a gradual step-by-step process

took billions of years to complete

utilized the natural laws and principles of chemistry and

physics

The creation process deduced from science is shown to be perfectly consistent with the scriptural description. After reading Divine Engineering, you will have a new and expanded appreciation for the process that God utilized to create the earth and its inhabitants.

Reviews- I absolutely loved reading this book. It was amazing how everything I read clicked and made sense when seen from a different point of view and with a little bit more understanding
