

Excerpt from Eclectic Short-Hand: Writing by Principles Instead of Arbitrary Signs, for General Use and Verbatim Reporting This system of short-hand writing has been before the public long enough to demonstrate, or to refute, the claim that it is the easiest to learn, the simplest in structure, the briefest, and yet the fullest phonetic writing of the language which has yet been devised, and it still lives. This edition is a thorough revision of all the previous editions, containing such modifications of the several principles and expedients as practice has shown to be valuable. The plates for this edition are entirely new, and are made by the phototype process. Not a line of engraving, but everything is as if fresh from the pen of the rapid writer. Written at a rapid rate, they represent such work as is of the greatest value to the learner, because they are easy and rapid, instead of labored and slowly engraved outlines. The learner will see in these sample pages of a pure, natural, easy style of reportorial short-hand precisely what he must be able to do, and the reading of these will be in effect the same as reading his own perfectly written verbatim notes. The last vestige of vertical characters is eliminated from this edition, even the vertical ticks. All the characters now are either left oblique, right oblique, 01\* horizontal, and so similar to the movements of long-hand, to which the hand is already accustomed, that the ease with which they are written is worthy of attention. The author feels safe in characterizing it a free-hand short-hand. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
