

Provides the surgeon with the information needed to stay current within this fast-developing field. Drs. Bostwick, Eaves and Nahai along with the Emory Team lead the way in developing new techniques, instruments and protocols for endoscopic surgery. The content is based on the acclaimed training courses which the Emory Team have pioneered to train surgeons in endoscopic skills and technique, and informs them of the clinical applications they can add to their practice. Covers all current aesthetic surgery applications including face, neck, brow lifts, augmentation and abdominoplasty. Also provides information on mastectomy, tissue expansion, carpal tunnel repair, excision of benign and malignant masses, harvesting muscles, veins and nerves, as well as detailed information on training, credentials and future applications. The text is supported by numerous colour illustrations, drawings and clinical photographs. Each operative step demonstrates the excellent results which can be achieved with minimum scarring using endoscopic approaches in aesthetic and reconstructive plastic surgery.
