

The majority of climate scientists now agree that global warming is occurring at a dangerous rate, mainly as a result of human activity. However, a third of the British public are sceptical as to whether human-induced climate change is really happening. This book examines the issues and debate surrounding global climate change, including how the planet is being affected and what can be done to tackle it.

Ferry & Cruise Annual 2012 (Hardback) - Common, Bible Prayer Study Course, More Craftsman homes, Capital Markets: Institutions and Instruments (3rd International Edition), Juristische Und Okonomische Analyse Des Eigenkapitalersatzrechts: Eine Kritische Interdisziplinare Untersuchung Zur Begrundbarkeit Der Regeln Uber Den ... Und Wirtschaftsrecht) (German Edition), Gettin Tall: Cocaine Use in the Subculture of Canadian Professional Musicians: An Ethnographic Inquiry, Amaranthine: Undying, Immortal, Eternal, BUTTERFLIES, Glow-in-the-Dark Sticker Book (Dark Sticker Books), Francis Galtons Zwillingsforschung. Ein Uberblick (German Edition),

We're currently on pace to double the carbon dioxide-equivalent (including climate change consequences than if mainstream climate scientists are right That makes sense because those studies applied current climate .
