

I am an American Soldier, well trained, educated, nurtured and raised to be honest, to reduce waste, to do every project successfully at less cost and with military discipline and precision, to do what is right, legally and morally, and to unite and treat everyone, men and women, equally, fairly and justly. I am a Nigerian first and foremost. I am also an American citizen. I was born and raised in Ugborodo Village (where Chevron exploits crude oil), Delta State of Nigeria. I am the best Candidate for the Presidency of Nigeria in 2015 because I have a vision to rescue Nigeria's economy, by investing heavily in science and technology with our oil money, establishing new universities, the equivalent of Harvard, Yale, MIT and Oxford or better, in the rural areas of Nigeria, to pull people from the congested cities to a more serene, natural environment in the rural areas, to establish a state-of-the-art science laboratory attached to these new universities in the rural areas, establish farm and manufacturing plant to be attached to every university in Nigeria, because everything taught in the new Nigerian schools, colleges and universities must have real life applications to the students, and most important, to establish a Federal and State agencies for the protection of the environment, from pollution and damage to our ecology and our environment, with strict enforcement and punitive measures for violators, because my leadership is going to protect Nigeria's fresh water (both underground water, surface water, etc), and establish beautiful National Parks all over the new Nigeria and under my leadership in the new Nigeria, the government is going to invest heavily in fresh water (as the next equivalent of crude oil) and export it to countries all over the world, as a major source of revenue. Also, by providing free education, the equivalent of the education at Harvard and Oxford universities, or better, for all Nigerians to get a professional degree or skill and to get free monthly allowance of \$100-\$500, plus free feeding and accommodations for all the students while in the university (and a lump sum of three million naira to the graduates in the New Nigeria to settle down), to share the oil wealth with all Nigerians by giving out grants of \$2,500 to \$6,500 to all Nigerians who cannot attend the university, to start a business and become self-reliant, to provide for all Nigerians with the oil wealth by giving monthly allowance of \$100-\$500 to all disabled people and all old people of 65 years and above with no source of income, to invest heavily in science, technology, agriculture, infrastructures, eliminate crime almost to zero level, by making everyone in the new Nigeria well educated and well taken care of financially, and placing so much emphasis on integrity, morality and ethics (that is, doing only what is excellent, doing what is right, legally and morally) and thereafter bring American big corporations, Chinese corporations and European corporations to outsource into Nigeria's economy with friendly rules and without any tax if they commit to help our economy, to develop the Nigerian economy to be on the same level with the United States in about four years with the help of Nigerians and with the help of some of the best engineers and scientists in the United States Army (where I am a member) and/or in the United States society, and thereby making Nigeria and the United States of America have unbreakable bonds, economically, politically, socially and otherwise.
