

This is both a fascinating personal narrative of the often colorful warriors rebuilding a part of war-torn Yugoslavia, and a detailed inside look at how experts can stabilize a nation's currency and banking system. Written by an American who has led International Monetary Fund advisory missions to the central banks of more than twenty countries, this book, crafted in layman's language - but of immense value to specialists in monetary and foreign policy initiatives - is an account of the behind-the-headlines work American and other economists do to bring peace and prosperity to former failed states. Coats was involved in the creation of the Central Bank of Bosnia from before the Dayton Peace Accords. His currency board rules for monetary policy, and the creation of the bank, have resulted in the most successful state institution in the country. Marking the tenth anniversary of the bank, the technical world of economics comes alive as the book unfolds like a mystery novel full of colorful and determined people determined to escape the disaster of a bloody civil war.
