

2010 Reprint of 1931 Edition. In this 1931 Wall Street classic Neill explains not only how to read the tape, but also how to figure out what's going on behind the numbers. Full of graphs and charts, it contains excellent sections on human nature and speculation. Though first published in 1931, this work remains a classic text in the field, and greatly influenced Nicholas Darvas, a later Wall Street Guru. Neill advised that the investor not follow the general public and he himself was very wary of the crowd mentality. Neill's philosophy pushes the reader to study hard and pay one's dues. He insists that the successful trader is an educated entrepreneur; one who can make reasoned decisions based on the movements of price and volume.
