

In this compelling book, David Hendry and Mary Morgan bring together the classic papers of the pioneer econometricians, some of which have never been published before. Together, these papers form the foundations of econometric thought. They are essential reading for anyone seeking to understand the aims, method and methodology of econometrics and the development of this statistical approach in economics. An editorial commentary places the readings in their historical context and indicates the continuing relevance of these early, yet highly sophisticated, works for current econometric analysis.

Antidiscrimination Law and Minority Employment: Recruitment Practices and Regulatory Constraints, The Song of Solomon (A Study of Love, Sex, Marriage and Romance), Biomarkers in Neoplastic Neuropathology, Bunker Hill: A City, a Siege, a Revolution, Holt Science & Technology Texas: Datasheet For Labs Grade 8 Physical Science, Saturn (Exploring the Solar System),
