

Inventor and futurist Ray Kurzweil examines the next step in the evolutionary process of the union of human and machine. He foresees the dawning of a new civilization where we will be able to transcend our biological skills with the vastly greater capacity, speed and knowledge-sharing abilities of our creations. In practical terms, human aging and illness will be reversed; pollution will be stopped and world hunger and poverty will be solved. There will be no clear distinction between human and machine, real reality and virtual reality. The Singularity is Near offers a view of the coming age that is both a dramatic culmination of centuries of technological ingenuity and a genuinely inspiring vision of our ultimate destiny.

Natural History of Infectious Disease, Five Minutes on Mondays 1st (first) edition, Diagnostika potentsialnykh priyemnykh roditeley (Russian Edition), Pythagorean Meaning of the Female Russian Names, St. Vincents Child: The Autobiography of James A. Schindler,
