

Excerpt from The Wisconsin Archeologist, Vol. 7: Additions to the Record of Wisconsin Antiquities II Since the publication in 1906 of A Record of Wisconsin Antiquities, a sufficient amount of data has been assembled to make possible the issuing of the present bulletin. The reception accorded the original record was most gratifying to the Society. Its distribution has been the means of encouraging others to assist in the location work. The surveys of the Lake Koshkonong region have been completed but the new records for that district, which are quite numerous, will be withheld until the Messrs. A. B. Stout and H. L. Skavlem have published their summary, now in preparation for the press. Mr. Stout has also completed re-surveys of some of the many mound groups about Madison, and has been successful in locating and platting a number of groups and of other evidences which had escaped the notice of early investigators. The research work of the Messrs. G. H. Reynolds and H. C. Fish in Wood and Marathon counties has made notable progress. Mr. P. V. Lawson has conducted location work in several counties. The names of other members contributing to the present issue appear throughout the following pages and need not be repeated here. They are deserving of the gratitude of the public and students for their efforts. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
