

Bone and joint infections may be life threatening and result in crippling disability in survivors. The future promises new therapies for musculoskeletal infections, but also the emerging menace of antibiotic resistance. This issue explores advances and controversies in the management of osteomyelitis and septic arthritis, the challenge of methicillin-resistant *Staphylococcus aureus* (MRSA), antibiotic resistance in the management of gonococcal arthritis, the role of new drugs in the management of fungal bone and joint infection, and the latest in Lyme arthritis, reactive arthritis, viral arthritis, prosthetic joint infection, management of open fractures, musculoskeletal infections with multi-drug resistant tuberculosis, septic bursitis, tenosynovitis, and pyomyositis. This special issue will be of great interest to the widest medical audience, including general internists, infectious diseases physicians, orthopedic surgeons, sports physicians, rheumatologists, and pediatricians.

The Planets (Sky Watching), Grammaticalisation Paths of Have in English (Studies in English Medieval Language and Literature), 2014: Un año lleno de gracia (Spanish Edition), LoveSex: An Integrative Model for Sexual Education (The United Kingdom Council for Psychotherapy Series), Microbiology of Fruit and Vegetable -Modern Foreign Food Science and Technology Series (Chinese Edition), Exploring the Lakeland Fells, Invisible City: Poverty, Housing, and New Urbanism,
