

The pages of history are littered with wreckage from the conflict and battles that arise from the differing natures of men and women. A mixture of love, lust and the battle for dominance in this realm of the often misunderstood, has caused endless conflicts and strife for as long as men and women have lived together as two interdependent parts of a single species. Many end up as casualties and the walking-wounded in such matters of the heart and mind, and all too many enter into despair and confusion when the dreams that are often based on the over idealisation of the man-woman dynamic fail to live up to actual and truthful realities that derive from our base animal natures. Vas Deferens was written to take a warts-and-all look at many of the root causes of these age old problems, and to deal with these issues in a half-humoured, half-provocative way so as to perhaps gain some small insight what for many of us can be a very difficult subject to face, never mind discuss openly, as such cuts often run deep. This book looks at the way that our genetics, our attitudes and much of the modern day societal expectations influence how we either deal with or ignore the subtle but unwritten language of the man-woman relationship. This volume also contains a section titled What Is?, which asks the reader to consider their own place in the family of man, as a son, daughter, mother, husband, wife, son or daughter. Do you see yourself as you truly are? Can you look? What you read may well cause you to be outraged, shocked or insulted, but you have been warned before you open the pages, so the choice is now yours. Be that as it may, the contents may also actually provoke you to think with a little more depth, and with a lessened tendency to bite the head off the members of the opposite sex, and perhaps even see them in a more humane light, in future encounters. Will you look? Can you look?

This list of related male and female reproductive organs shows how the male and female . The male external genitalia include the penis, the male urethra, and the scrotum. The female external genitalia include the clitoris, the labia majora, and the labia minora. List - Internal organs - External organs.
